

BaZi vs Western Astrology: Comparison

Two calendars, two psychologies.

BaZi vs Western Astrology — Honest Comparison

- Core unit: birth MOMENT as 8 characters vs birth moment as planet positions.
- Time logic: stems-branches calendar cycles vs tropical zodiac + planetary transits.
- Self concept: Day Master + its relationships vs Sun/Moon/Ascendant complex.
- Prediction style: luck pillars (decades) + annual stems vs transits + progressions.
- Shared limit: both are interpretive frameworks, not measurement instruments.

Many practitioners study both. BaZi excels at elemental balance; Western astrology excels at psychological narrative.
