

Useful God: Decision Flowchart

Strong or weak first. Everything follows.

Finding the Useful God (用神) — Flowchart

- 1. Is the Day Master strong or weak? (Season + stems + branches.)
- 2. If STRONG → Useful God drains or controls it: Output, Wealth, or Officer.
- 3. If WEAK → Useful God feeds it: Resource (Seal) or Friend.
- 4. Check the luck pillars: does the current decade bring the Useful God or take it away?
- 5. Sanity check: a Useful God that is clashed or voided in the chart is weakened.

The Useful God is the element the chart is thirsty for. Everything else in the reading serves this one answer.
