

Luck Pillars: How Decades Work

Decades set the weather; years bring events.

Luck Pillars (大運) — One Page

- Each pillar = 10 years. Yang males + yin females go forward; the rest go backward.
- Start age: count from birth to the next solar term (Jie), divide by 3 $\approx$ starting age.
- Read a pillar by its Ten Gods vs the Day Master — and whether it brings the Useful God.
- Annual overlay (流年): the year's stem-branch plays against the active decade pillar.

Decades set the weather; years bring the weather events. Never read a year without its decade.
